Making a Million Dollar Impact in the Lives of Haitian children

Project Hope is our plan to strengthen the programs and services provided to all our sponsored children. In 2022, a generous foundation has approved the projects on this list and is matching all donations up to $500,000!

Christian Education & Spiritual Training
Some of our ten schools need significant capital investments. Project Hope plans call for two schools to be built and for additional classrooms to be constructed at existing schools. Each new classroom will need new desks and a chalkboard. Within the Project Hope framework, all students will receive spiritual training at their local schools and leadership opportunities at Camp Hope.

*____ denotes fully funded through generous donations!

Hinche: Build 2nd floor & classrooms ........... $60,000
Hinche: Flooring for rooftop & walls ........... $10,000

Food, Water, Health Care & Orphan Care
In response to the overwhelming need for adequate nutrition, Project Hope ensures that every student receives a nutritious lunch every school day and has access to clean drinking water. In addition, with so many families lacking health information and access, a goal is to improve accessibility of health care. Project Hope highlights the need for excellence in orphan care by planning facility improvements and by developing vocational training programs that will equip older students with essential skills for independent living.
